SUMMARY

Proactive and Goal-Oriented B.Tech 3rd-Year CSE Student with a strong foundation in MERN Stack Development, Machine Learning, and Data Analytics. Passionate about turning ideas into innovative real-world solutions.

EDUCATION

Degree	Institute	Board / University	CGPA/Percentage	Year
B.Tech - CSE	Madanapalle Institute of Technology & Science	JNTUA, Anantapur	8.29 (Till 5th Sem)	2023-2027
Senior Secondary	Sri Siddhartha Jr. College	BIEAP	91%	2023
Matriculation	Vijaya Bharathi E.M High School	BSEAP	100%	2021

WORK EXPERIENCE

- AI/ML | Graph Analytics | FinTech Fraud Detection** Jan 2026 - Feb 2026
Research Project – FinTrace AI Faculty Guided
 - Developed FinTrace AI, a graph-based financial fraud detection system to identify circular fund flows, shell structures, and smurfing patterns using NetworkX.
 - Implemented FastAPI backend with risk-calibrated suspicion scoring and interactive fraud visualization. **(Try it here)**
 - Integrated statistical anomaly detection and LLM-based explanations to generate human-readable compliance insights.
- Data Science Intern** June 2025 - July 2025
InternPro Remote
 - Built a Startup Growth Prediction model using machine learning techniques in Python and Scikit-learn.
 - Performed data cleaning, feature engineering, and EDA to identify key factors influencing startup growth.
 - Trained and evaluated predictive models to support data-driven business decisions. **(Try it here)**

PROJECTS

- Face Recognition Attendance System** Sep 2025 - Oct 2025
SIH 2025 Project, Selected in Internal College Level Hackathon
 - **MERN Stack Web App:** Attendance records managed with MongoDB, backend APIs built with Node.js/Express, and a React frontend for user interaction.
 - **Python Face Recognition Integration :** Implemented using OpenCV/face_recognition in Python, connected to the web app to capture and verify faces, updating attendance in real time.
- Crowd Management System** Jan 2026 - Mar 2026
Made for colleges
 - Developed a crowd monitoring Web App using React and PostgreSQL to verify student entry at college events through QR code scanning. Implemented an email-based system to generate and send unique QR codes to students, ensuring only authorized participants could access the venue.
 - Built a secure login system for authorities and Implemented real-time entry tracking and data visualization dashboards to analyze crowd flow, peak entry times, and venue capacity, providing insights for event organizers and sponsors.

TECHNICAL SKILLS

- Programming Languages and Databases:** C, Python, Java | MySQL, PostgreSQL, MongoDB.
- ML Frameworks / Models:** Scikit-learn, TensorFlow, PyTorch, OpenCV, face_recognition | CNNs, Graph Neural Networks
- Tools and Cloud Platforms:** Git & Github, JupyterNotebook, VS Code | Vercel, Render, AWS(basic services), Docker.
- Development:** HTML, CSS, JavaScript, ReactJS, ExpressJS, NodeJs (MERN stack).

CERTIFICATIONS

- Java Full Stack Development:** Completed Java Full Stack Development training at Zidio Development, gaining hands-on experience in Java, ExpressJs, NodeJs, RESTful APIs, and React. Learned to build end-to-end web applications with database integration, authentication, CRUD operations, and Git-based version control.
- Acquiring Data:** Learned core data handling concepts, including data acquisition, storage, validation, and preparation using Python and Pandas. Built foundational skills for analytics, data science, and AI applications.

EXTRA-CURRICULAR ACTIVITIES

- RIFT Hackathon 2026:** Selected for RIFT Hackathon 2026 at Bengaluru through project-based evaluation and ranked among the Top 10 teams in the Hackathon, organised by Physics Wallah Institute of Innovation.
- SIH 2025:** Selected as Team Leader in the internal college-level hackathon to represent the college at the National level Smart India Hackathon (SIH) 2025 and develeoped the Face Recognition Attendance System.
- CTC BUIDL IDEATHON 2026:** Attended Ideathon 2026 in Bengaluru, gaining exposure to blockchain innovations. Collaborated with peers to develop a solution for the CreditCoin ecosystem, including prototype design and implementation..
